

**Introducing the World's
1st Eco-Friendly Golf Ball**

The World's ONLY 100% 'Green' Golf Ball

It begins at the core! The Dixon Earth ball is green to the core. The Earth core is made from a proprietary polymer that maintains the playable properties of the ball, but ensures that it is **100% renewable**. Most manufactures would stop there... Not Dixon! Our commitment to the environment and to your golf game is 100%. In addition to the core, the entire Dixon Earth ball is manufactured with materials that can be totally re-ground to basic elements and used to make brand new balls or other consumer products.

Dixon Earth Golf Balls:

- The entire golf ball is made from materials that can be reconstituted and recycled.
- Packaging is made from 100% recycled material.
- Our manufacturing processes are significantly less harmful to the environment.
- Dixon Earth conforms to USGA standards and plays like the highest quality name brands.

Other Golf Ball Brands:

- Use harsh heavy-metal pollutants like tungsten, cobalt and lead.
- Packaged in non-recycled or even non-recyclable materials.
- Contain non-renewable synthetic materials and compounds including polyisoprene, polynorbornene, butyl rubber, bismuth subcarbonate and cupric oxide.

Dixon Earth's Recycling Incentive Program

To facilitate conservation, Dixon has established a cutting edge program to incentivize golfers to return spent Dixon Earth golf balls for a generous discount on future orders. Each box of Dixon Earth includes a return mail pouch so golfers can easily mail used golf balls back to Dixon to be recycled and reused to make new golf balls or other post-consumer items.

From core to cover, from packaging to production, Dixon Earth is setting a new standard in environmental consciousness!

Improve the Earth, Improve your game! Dixon Earth!

A truly unique 100% biodegradable golf tee product produced in Austria now available in North America. Biogolftee® products are made mainly from cellulose and starch mixed with other natural polymers. They degrade after 6-12 weeks in a compost environment, and do not affect the environment or interfere with mowing machines. Even the pigments used to create the 6 different colors, as well as the ink used for personalization, are environmentally friendly.

To protect the beauty of the game, the quality of a tee is a very important factor. Biogolftee® products are more durable than standard wooden tees and offer a perfect tee-off. To make them even more unique, you can customize each individual tee on both sides without additional cost. The personalization of the tees encourages strong product-user affinity.

Combine your promotional message with the patented design of our 'Matchbooks' filled with our 100% biodegradable tees, divot tools and ball markers for a complete green solution!

degrades within 6-12 weeks

Biogolftee® was awarded the first place in "Eco-design - Form Follows Sustainability" - Accessories category at the **2008 Volvo Eco-Design Forum** in Munich.

100% biodegradable

Our Biogolftee® 'Matchbooks' make ideal promotional items for Tournament Sponsor Corporations, Golf Clubs, Hotels, etc. Let us customize your matchbook set at no additional cost!
